

+ SMART STORAGE & DRYING SOLUTIONS | SNOW

EXPERT

Koralp, the strength of experience

For ten years Koralp has been strengthening its **leadership position** in ski rental store storage and fixtures. By widening its technical storage range, the company has become the reference for ski schools, resort accommodation, ski lift companies, and individual ski home or apartment owners.

Each day we strive to improve our solutions thanks to our vast installed user base and customer experience, including hundreds of successful customer installations and the thousands of Koralp products in use. Our team is continually innovating our ski gear storage offering to stay ahead of the market and surpass customer expectations. This continual adaptation process spans new ways of storing, drying and even charging batteries, and involves adapting to changing end-customer needs, accommodating new sales channels, and evolving our service and **level of quality**.

The Koralp brand, smart solutions

Designed in our research
department

Built to last

Customized design

Koralp has built its reputation on the conception of innovative, **high-value** products and solutions. Each product range is designed for specific customer needs.

Whether you need to optimize or even reduce your storage space, you need fast, energy-saving drying capabilities, or you focus is design and ease of use, our **product development process** encompasses all these areas.

Your user experience feedback, your ideas, and your change requests, are the driving forces behind our creativity, ensuring we create the right solutions for your business. Designed by our R&D department and manufactured in the heart of the Alps, Koralp products are renowned for their **quality, robustness and modularity**, as well as their capacity to be seamlessly integrated into your store space.

Koralp, custom made solutions

Ski patrollers, mechanics, drivers and instructors are all daily users of ski equipment. By integrating **storage and drying facilities** into their changing areas, you can provide true added value to your staff's work environment. Ensuring easy – and potentially secure – storage of their equipment also has the added benefit of extending equipment life.

With products from the Koralp Expert range, we provide individual and collective storage and drying solutions designed to meet the **needs of mountain professionals**. To design the best solution for your needs, we closely analyse your way of working, study the designated storage area, and aim to fully understand the finer level detail you require.

Our 3D design tool lets us quickly create plans and layout proposals integrating your specific requirements, with the goal of rapidly defining the solution that will bring maximum **success to your project**. We discuss each proposal in detail, to ensure the selected solution best meets your needs in terms of storage capacity, of flexibility for future needs, of optimum flow and circulation. Our goal is to guarantee **your real satisfaction**, by exceeding your expectations and by building a long-term relationship based on confidence and trust.

A concept of all-in-one ski depot

The individual **ski depot** equipped with a boot dryer is a service greatly appreciated by the users, particularly when it is placed at the bottom of a slope and accommodation is scattered throughout the resort. Once the room found and the equipment installed, the question is how to use and market it. The answer is in Skicase, a **self-service ski depot** solution which combines online booking, the integration with most ski pass sales systems, the planning of occupancy schedule, an access control system(via a code, a ski-pass or smartphone), a hotline for users , scoreboards and customer satisfaction surveys. Our concept offers you a **global solution**: spatial planning, back office management, hotline. Return on investment is guaranteed within the first year, once the occupancy rate 30 % threshold is reached.

More than 850 Skicase ski depots have been installed over the past three years in a dozen Alps and Pyrenees resorts. Due to the success of this service, each partner has increased the number of ski depots within the end of the first season to keep up with the increasing demand.
