K-STOKDRY A04 & A06
USER MANUAL
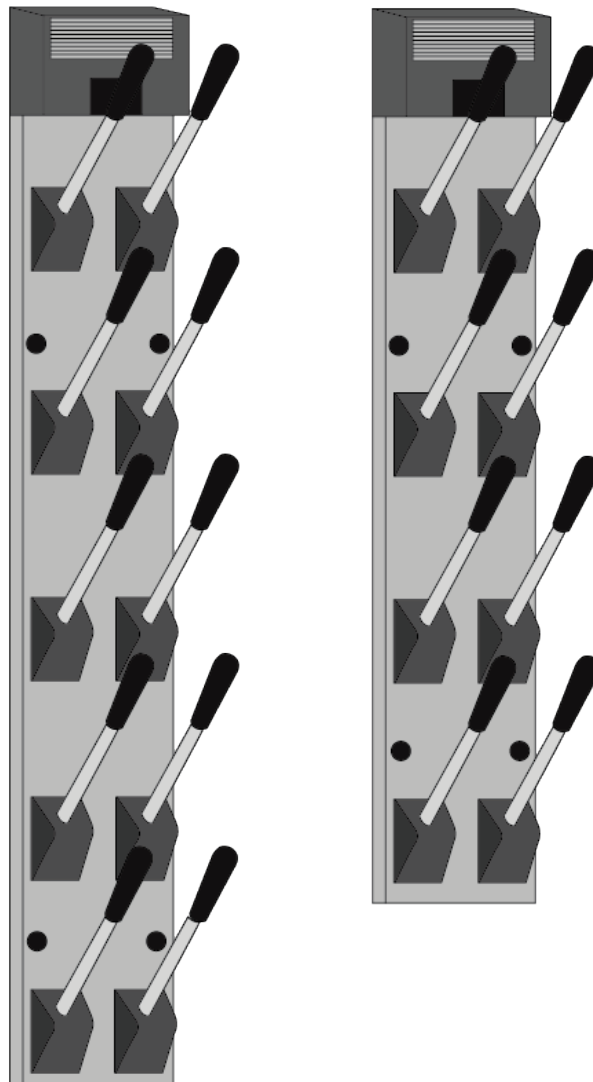

JONES BROS LTD

Distributing Life Enhancing Equipment Since 1908

Unit Overview & Default Settings

The unit has two buttons:
- Green Button (Left) - Controls power and ventilation
- Red Button (Right) - Controls the heater
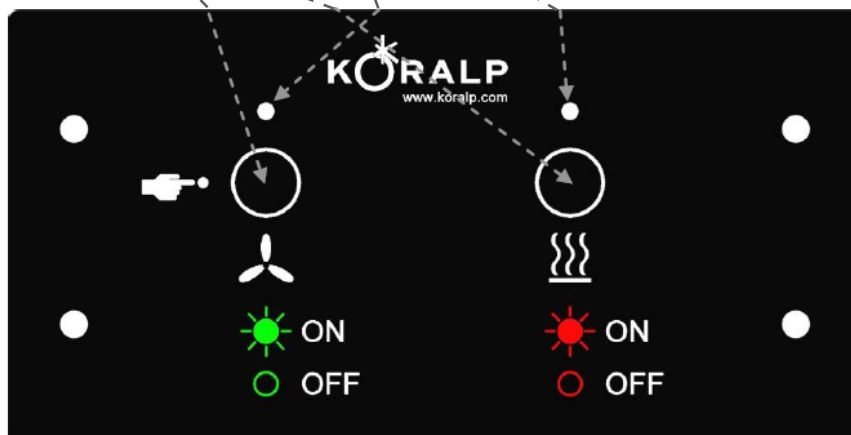

Default settings:

When connected to power (230V AC), the unit automatically starts with these default settings:

- Ventilation: 2 hours
- Heating: On

These defaults can be changed (see "Changing Default Settings" section below).

FUNCTION	VALUE	BlinkLED
Ventilation	*2 hours*	
Heat	*Activate*	

HOW TO USE THE UNIT:

Turn the Unit ON

- Press the green button briefly (less than 1 second) to start ventilation and heating for 2 hours.

Turn the Heater OFF or ON

- Press the red button briefly to toggle the heater off (or back on if it was off).

Turn the Unit OFF

- Press the green button briefly again to stop both ventilation and heating. The fan will continue running for 10 seconds to cool the heater before stopping.

Safety Shutdown: Overheating or Sensor Failure

If the unit detects high temperature or a disconnected temperature sensor:

- Heating stops immediately
- Ventilation stops after 10 seconds
- Red LED flashes rapidly

To reset the unit:

1. Unplug and reconnect the power, or
2. Hold both buttons (green + red) for more than 3 seconds

Changing Default Settings

Only change settings when the unit is completely off (no LED lights on).

Changing Ventilation Duration

1. Hold the green button while counting LED flashes:

- 2 flashes = 2-hour ventilation
- 3 flashes = 3-hour ventilation
- 6 flashes = Permanent ventilation

2. Release the button
3. Setting is saved
	Long press on ventilation button	Number of blinks	Value	Green LED blinking
VENTILATION	3 seconds < T < 5 seconds	1 to 2	2 hours	
	5 seconds < T < 8 seconds	3 to 5	3 hours	
	8 seconds < T < 10 seconds	6 to 7	Permanent	

At a glance

When running - LED flashes donate time

- 2 flashes = 2 hours
- 3 flashes = 3 hours
- Permanent (No flashing) = Permanent

Turning Heating On or Off (Default) When Off

1. Hold the red button for more than 5 seconds: Until flash and beep (tone)
- If heating is on, this turns it off
- If heating is off, this turns it on

2. Setting is saved.

LONG PRESS ON HEATING BUTTON	NUMBER OF BLINKS	VALUE	RED LED BLINKING
T > 5 seconds	At least 1	ON	
T> 5 seconds	At least 1	OFF	

How Settings Work

- Pressing the red button toggles the heater on/off
- When heating is on, the red LED flashes in sync with the green LED
- Once you change the ventilation or heating setting, the unit will use the new settings every time it starts

HEATING	Ventilation default settings	Red and green LED flashes
	2 hours	
	3 hours	
	Permanent	

Example: Set to Permanent Ventilation Without Heating

1. Make sure the unit is off (no LEDs lit)
2. Hold green button for 8 seconds (6 flashes) → Release
   - Green LED stays on → Permanent ventilation is saved
3. Hold red button for 5+ seconds → Heating turns off, red LED goes off

Now, every time the unit is powered on, it will start permanent ventilation without heating
– until you change the settings again, or reset to factory default by holding both buttons for
5 seconds when the unit is off.
